

CLIMATE YOUTHS PV

May 2022 – Newsletter 2

Climate Youths project utilises Participatory Videos as the method to facilitate young people's access and understanding of climate change while empowering them to take action on the topic. Through this project, 4 organisations from different EU countries will implement a series of training activities focused on fighting against climate change by contributing to the [13th Sustainable Development Goal](#) of the United Nations.

WHAT HAVE WE DONE?

Training Courses

We have already implemented 3 of the 4 planned courses.

- The first course took place in Cyprus and was attended by youth professionals from Germany, Greece and Spain.

- The second course took place in Greece and was attended by youth professionals from Germany, Cyprus and Spain.

- The third course took place in Spain and was attended by young people from Germany, Cyprus and Greece. This course was implemented by the Spanish youth professionals who attended the first courses mentioned above.

In the different courses the participants have learned about the current reality of the environment and how to use the participatory video methodology to raise awareness about this situation that affects us all.

Partners Meetings

During these months we did 3 online meetings with the objective of coordinating and designing the training courses.

We also did an online meeting with the participants of the training course in Valencia, Spain. In that meeting we talk with the participants about the objectives of the training and the kind of activities they would participate in.

A face-to-face meeting was also held in Cyprus to discuss the progress of the project and where we are now. We evaluated the courses that have been implemented so far and discussed how the dissemination of the project is going and the reach we are having. We also talked about the last course that will be held in Berlin with young people.

Website and social media

We continue to inform about climate change and the progress of the project in our Facebook page.

We update information about the progress of the training during the week that the participants spend in Greece and in Valencia.

In our [Youtube channel](#) you can find the video result of the two different trainings.
